

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

DO NOT ENTER: /H.N./

Listing of Claims:

Claim 1 (original): A system for reporting on integrity of a wireless communication link within a healthcare facility comprising:

a module associated with a medication treatment application device, the module having a status information output responsive to a signal output generated by the medication treatment application device;

a wireless remote device within the healthcare facility having a message indicator responsive to the status information output transmitted over the wireless communication link and representative of the signal generated by the medication treatment application device;

software installed on the wireless remote device having a time-out output; and,
wherein the time-out output indicates loss of the wireless communication link.

Claim 2 (original): The system of claim 1 wherein the association between the module and the medication treatment application device results in at least some data within the status information output passing through the module.

Claim 3 (original): The system of claim 1 wherein the medication treatment application device is an infusion pump for administering an infusion to a patient.

Claim 4 (original): The system of claim 1 wherein the output generated by the medication treatment device includes data related to an alarm condition.

Claim 5 (original): The system of claim 1 wherein the output generated by the medication treatment device includes data related to an alert condition.

Claim 6 (original): The system of claim 1 wherein the output generated by the medication treatment device includes data related to an infusion volume rate.
